International trade fair appearances of Zech Umwelt group of companies

<Bremen / São Paulo, Poznań, Paris, 10 December 2009> The subsidiaries of Zech Umwelt GmbH have exhibited at a number of international trade fairs.

Sapotec Ltda., the Brazilian subsidiary of Zech Umwelt GmbH, successfully participated in the 11th **FIMAI**, South America's largest environmental trade fair, in São Paulo, Brazil, from 4 to 6 November 2009. Sapotech welcomed potential customers and partners to a newly designed stand with an area of 60 square metres. This year, apart from performances of soil treatment facility, the main topics were contaminated site remediation services and consulting as well as water treatment.

Shortly after the Brazilian event, **Zech Nature Poland Sp. z o. o.**, active on the Polish market for a year, made its first trade fair appearance at the 21st **Poleko** environmental trade fair, held in Poznań from 24 to 27 November 2009.

To gain a first impression of Polish trade fair activities, the company had opted for a corner stand provided by the organizer. The 20 square metre stand was effectively supplemented by Zech equipment including roll-ups, posters, etc. All the equipment and literature were made available in Polish to facilitate effective discussions between our Polish-speaking colleagues and potential customers.

The Zech Umwelt Group was also represented at **Pollutec 2009**, a key trade fair for water, air, noise abatement and waste technology, held in Paris from 1 to 4 December 2009. On a stand of the State of North Rhine-Westphalia, **CARO**

Biotechnik GmbH, a Group company located in Aachen, presented itself at the international industry showcase.
