High expectations for IFAT ENTSORGA 2010, 13 – 17 September 2010 / Preparations for trade fair well underway

<Bremen/Munich, 26 July 2010> Zech Umwelt GmbH and its subsidiaries will be among the exhibitors at the key international trade fair IFAT ENTSORGA 2010 in Munich, on stand B2.309/408

The national and international market for tailor-made water and wastewater treatment solutions is steadily growing. Zech Umwelt GmbH intends to step up its activities in this field in the future.

We have high expectations for the international industry showcase ***IFAT ENTSORGA 2010, 13 – 17 September 2010 in Munich***, where we will be presenting our highly developed, innovative and reliable water solutions and our specific know-how in this area to existing and potential customers.

Preparations for the trade fair are well underway. We will be taking our 2008 stand, which customers found to be very open and inviting, as a basis for our presentation. The logo family of the Zech Umwelt Group, which we relaunched at the beginning of 2009, is set to make a positive contribution.

Together with our subsidiaries, we offer our guests an opportunity to discuss our new water systems and smart disposal solutions with the experts on ***Stand 309/408 in Hall B2***.

If you would like to arrange an appointment, our contact, Stefani Bode, would be pleased to hear from you:

You can already mark Tuesday, 14 September 2010 in your calendar: we invite you to enjoy Brazilian specialities and the appropriate music on our stand from 6 pm.

Be our guest. We look forward to seeing you.
